

PRAKASH YADU

Senior Java Backend Developer | Spring Boot · Microservices · Reactive Systems
Bangalore, India • +91 70222 80874 • prakashyadu10@zohomail.in

PROFESSIONAL SUMMARY

Java backend developer with 8+ years building robust, scalable, production-grade applications using Java, Spring Boot, Hibernate/JPA and Microservices. Recent work centres on a reactive, multi-provider LLM gateway platform — unifying Anthropic Claude, OpenAI/Azure OpenAI, Google Vertex AI Gemini and xAI behind a single API with rate limiting, spend governance, DLP redaction, streaming (SSE) and full observability. Experienced in message-driven systems with Kafka, cloud deployment (GCP, Azure, AWS) and CI/CD. Strong problem-solver and collaborative team player who enjoys challenging, high-ownership projects.

TECHNICAL SKILLS

Languages: Java (8 / 11+), SQL

Frameworks: Spring Boot, Spring MVC, Hibernate, JPA, Microservices

LLM / AI Integration: Anthropic Claude, OpenAI / Azure OpenAI, Google Vertex AI (Gemini), xAI — unified gateway, model routing, DLP

Resilience / Rate Limiting: Bucket4j, Redisson, retries, fail-open patterns, circuit-style safeguards

Messaging: Apache Kafka, Solace

Databases / Caching: Oracle, MySQL, PostgreSQL, MongoDB, Redis

Cloud / DevOps: GCP, Azure, AWS, OpenShift (OCP), Docker, CI/CD

Observability: Log4j, custom metrics & logging

Web / Frontend: HTML, JavaScript, Node.js, Angular

Tools: Git, Azure Repos, Maven, Postman, JWT, OAuth 2.0, Eclipse, STS, VS Code

Servers / OS: Tomcat, JBoss | Windows, Linux, Unix

PROFESSIONAL EXPERIENCE

Software Developer — Prodapt Solutions (Client: PayPal), Bangalore

Dec 2025 – Present

Project: Unified LLM Gateway — Model Automation (AI-Driven)

- Engineered a unified, reactive LLM gateway (Spring Boot + Project Reactor, Netty WebClient) exposing a single API that routes buffered (Mono) and streaming (Flux / Server-Sent Events) requests across Anthropic Claude, OpenAI/Azure OpenAI, Google Vertex AI Gemini and xAI by model prefix.
- Built the security and governance layers — token auth with user/org resolution and access roles, Bucket4j RPM rate limiting, a monthly USD spend cap with graduated pause/alert tiers, and fail-open DLP redaction of requests and responses.
- Integrated provider auth and token caching (GCP SA tokens, Azure MSAL4J, xAI API keys) with proactive in-process refresh, plus rule-based model routing (LLM-classifier fallback) that remaps requests to simple / complex / reasoning tiers.
- Instrumented end-to-end observability (Datadog LLM spans, Prometheus metrics, tool-usage telemetry) with Reactor retries; managed distributed state via Redis (Redisson), MySQL/PostgreSQL (Hibernate + Flyway) and Caffeine across environment-specific configs.

Java Software Developer — Capgemini Technology Services, Bangalore

Mar 2019 – Dec 2025

Clients: Standard Chartered Bank, SAP

- Developed and maintained fraud-risk-management (FRM) components for Standard Chartered's internet banking platform, including the Account Drainage System, Cooling Period, Kill Switch, TMX device integration and Soft Token integration.
- Delivered the CSE and eStatement modules — backend services covering requirements analysis, database design, development, debugging and production support.
- Built robust, secure backend microservices with Spring Boot, Hibernate/JPA and REST APIs; contributed as a frontend developer where needed.
- Participated in code reviews, unit testing and CI/CD; supported deployments on Azure and OpenShift.
- Recognised twice with the "Project Star" award for delivery and ownership.

Java Software Developer — Verinon Technology Solutions (Client: SAP)

Sep 2018 – Feb 2019

Project: VPM (Visa Permit Management) — SAP Labs

- Developed and maintained web applications and secure backend services; performed coding, debugging, unit testing and design.
- Collaborated with product owners to translate customer requirements into solutions; optimised code for performance and scalability and improved system security standards.
- Supported deployments and CI/CD on AWS and Azure and participated in the code-review process.

EDUCATION

B.E. in Computer Science & Engineering

2015

C.S.V.T.U., Bhilai, India

CERTIFICATIONS & COURSES

- **Generative AI for Java and Spring Development** — SkillUp (via Coursera), Apr 2026
- Certified Information Security Specialist (Ethical Hacking) — Cybercure Solutions
- Java & Git Copilot — Great Learning
- Embedded Systems & Robotics (participation)

PERSONAL DETAILS

Languages: English, Hindi • Location: Rayasandra, Bangalore • Interests: Drawing, Cricket, Cooking
